

Analytics. Recommendation. Action.

## Exinda WAN Orchestration Appliances

Exinda's WAN Orchestration solutions provide educators, enterprises and service providers with the ability to effortlessly exceed their network SLAs. Unlike traditional WAN appliances that only focus on making the network faster, Exinda Network Orchestrator focuses on making the network more reliable, more productive and improves application performance with interactive analytics, a prescriptive recommendation engine, and powerful actions like shaping and optimization all in one platform. With solutions designed to scale to meet the needs of the smallest branch office and the largest data center, find out how Exinda Network Orchestrator can make it easy to solve the most pressing IT problems in your network environment.

### SMALL BRANCH OFFICE - EXINDA 2061

Exinda Network Orchestrator 2061 is the perfect branch office appliance for small and medium businesses. Architected for branch networks that need to support up to 50 users, the 2061 delivers the best price-performance in the category. Network managers who need improved performance for business-critical applications will find the perfect combination of application acceleration and bandwidth control at a reasonable price point. One of our most popular appliances, the 2061 is the most innovative small branch WAN solution on the market today.

<b>Max Users</b>	Up to 50
<b>Max Acceleration Throughput</b>	6 Mbps, 600 connections
<b>Max Shaping Throughput</b>	10 Mbps, 32,000 flows
<b>Edge Cache Capacity</b>	20 Mbps
<b>Data Store</b>	240 GB
<b>NICs</b>	2 bypass bridges, or 1 bypass bridge plus 1 management, 1 cluster
<b>NICs Expandable to</b>	None
<b>NIC Type</b>	1 GbE
<b>Power Supply</b>	External, auto ranging
<b>Form Factor</b>	1U rack mount or desktop

### SMALL BRANCH OFFICE - EXINDA 3062

The Exinda 3062 is the perfect branch office appliance for small and medium businesses. Architected for small branch networks, the 3062 delivers the best price-performance in the category. Network managers who need improved performance for critical WAN-based applications will find the perfect combination of power and speed at a reasonable price point. And for branches trying to control inbound internet traffic or prioritize VoIP and Video applications, the 3062 is a perfect fit. One of our most popular appliances, the 3062 is the most powerful small branch network solution on the market today.

<b>Max Users</b>	Up to 100
<b>Max Acceleration Throughput</b>	20 Mbps, 1000 connections
<b>Max Shaping Throughput</b>	100 Mbps
<b>Edge Cache Capacity</b>	160 Mbps
<b>Data Store</b>	385 GB
<b>NICs</b>	2 bypass bridges, 1 management, 1 cluster
<b>NICs Expandable to</b>	None
<b>NIC Type</b>	1 GbE
<b>Power Supply</b>	External power brick, auto-ranging, field replaceable
<b>Form Factor</b>	Desktop unit with optional rack mount kit available

### MEDIUM BRANCH OFFICE - EXINDA 4062

Exinda Network Orchestrator 4062 is our most powerful branch office appliance designed for customers with rapidly growing bandwidth needs who require the flexibility to upgrade in the future. The 4062 can be deployed as a 100 Mbps system and easily upgraded to 1 Gbps, with expandable network interfaces and remote management capabilities. If you're concerned about scaling to meet the future needs of your network, the 4062 is for you.

<b>Max Users</b>	Up to 20,000
<b>Max Acceleration Throughput</b>	30 Mbps, 2,500 connections
<b>Max Shaping Throughput</b>	1 Gbps
<b>Edge Cache Capacity</b>	300 Mbps
<b>Data Store</b>	864 GB
<b>NICs</b>	3 bypass-enabled bridge pairs 1 GbE
<b>NICs Expandable to</b>	1 slot for additional 2 bridge 1 GbE copper or 1 bridge 1 Gb fibre
<b>NIC Type</b>	1 GbE
<b>Power Supply</b>	Internal - auto ranging
<b>Form Factor</b>	1U rack mount

### SMALL DATA CENTER - EXINDA 6062

Exinda Network Orchestrator 6062 is the most practical data center appliance in our portfolio. Designed for mid-sized companies that need a WAN solution that scales up to 2.5 Gbps. For data center grade appliances, the 6062 provides the best performance for pragmatic, mid-market companies. One of our most popular appliances in retail, manufacturing and government, the 6062 delivers exactly the right amount of performance for environments supporting up to 50,000 users.

### DATA CENTER - EXINDA 8062

Exinda Network Orchestrator 8062 is our fastest growing product line and is designed for true data center scale. This WAN orchestration appliance can serve environments with up to 100,000 users and provide monitoring and control that scales to support bandwidth up to 5 Gbps. Popular with mid- and large size enterprises and education institutions with rapidly growing users, devices, apps and activities across all network locations. Built to scale, the Exinda 8062 makes it easy to protect application SLAs during high volume peak hours as well as control recreational traffic and streaming video which can bog down your network.

### LARGE DATA CENTER - EXINDA 10062

The Exinda 10062 is the most powerful data center grade appliance from Exinda. Architected to serve the largest data centers and service provider networks, the 10062 is built to scale with your business. With exceptional power and bandwidth capacity, our most powerful appliance can protect application SLAs no matter what the network throws at it. Built for companies and service providers with extremely high traffic volume and whose business depends on meeting and exceeding network application SLAs.

### FLEXIBLE SCALING - EXINDA VIRTUAL APPLIANCE

Exinda's innovative virtual Network Orchestrator is designed for mid-sized companies and education institutions that need improved network performance but want to avoid introducing additional hardware into their data center or branch office. Our virtual appliances are designed to scale with your needs and make it easy to add improved performance to your network as needed. Virtual appliances can be easily integrated into your branch network without additional hardware purchases, and save you from regular hardware upgrades as your network expands. Exinda's virtual Network Orchestrator is ideal for virtualized IT environments and consolidated branch offices.

<b>Max Users</b>	Up to 50,000
<b>Max Acceleration Throughput</b>	50 Mbps, 10,000 connections
<b>Max Shaping Throughput</b>	2.5 Gbps, 500,000 flows
<b>Edge Cache Capacity</b>	900 Mbps
<b>Data Store</b>	1.7 TB, built-in redundancy
<b>NICs</b>	No bridge standard. 1 management, 1 IPMI
<b>NICs Expandable to</b>	4 bridges, 1 management, 1 IPMI
<b>NIC Type</b>	1 GbE with 10 Gb option
<b>Power Supply</b>	Dual redundant internal, auto ranging, field replaceable
<b>Form Factor</b>	1U rack mount with included sliding rails

<b>Max Users</b>	Up to 100,000
<b>Max Acceleration Throughput</b>	155 Mbps, 10,000 connections
<b>Max Shaping Throughput</b>	5 Gbps, 5,000,000 flows
<b>Edge Cache Capacity</b>	900 Mbps
<b>Data Store</b>	2.7 TD, built-in redundancy
<b>NICs</b>	No bridge standard. 1 management, 1 IPMI
<b>NICs Expandable to</b>	13 bridges, 1 management, 1 IPMI
<b>NIC Type</b>	1 GbE with 10 Gb option
<b>Power Supply</b>	Dual redundant internal , auto ranging, field replaceable
<b>Form Factor</b>	2U rack mount with included sliding rails

<b>Max Users</b>	Up to 200,000
<b>Max Acceleration Throughput</b>	400 Mbps, 25,000 connections
<b>Max Shaping Throughput</b>	10 Gbps, 5,000,000 flows
<b>Edge Cache Capacity</b>	900 Mbps
<b>Data Store</b>	1.5 TD RAID 10, built-in redundancy
<b>NICs</b>	1 bridge, 1 management, 1 cluster, 1 IPMI
<b>NICs Expandable to</b>	15 bridges, 1 management, 1 cluster, 1 IPMI
<b>NIC Type</b>	1 GbE with 10 Gb option
<b>Power Supply</b>	Dual redundant internal, auto ranging and field replaceable, 1100W
<b>Form Factor</b>	2U rack mount with included sliding rails
